

SkillSphere - Intelligent Hyperlocal Freelance Ecosystem

Project code package generated from the Nayoda internship PDF requirements.

Core modules: multi-role authentication, AI job matching, freelancer profiles, gig marketplace, proposals, chat, payments, reviews, notifications, disputes, admin analytics, availability scheduling and project progress tracking.

Demo flow:

1. Client registers and posts a gig.
2. Freelancer registers, creates profile and applies to gig.
3. Client accepts/rejects proposal.
4. Chat, notifications, payments, reviews and admin monitoring are available.
